

Sosta stainless pipes in Könnern, Germany

Since 2017, the international BUTTING Group has a further production site: Sosta stainless pipes. The core business is the production of high quality longitudinally welded stainless steel pipes. Stainless steels are processed in five production halls covering nearly 18000 m². These additional capacities in Könnern enable us to meet individual demands at very short notice. A further advantage is the geographic location in the heart of Europe with direct access to the motorway network and the close proximity to the biggest European sea and air terminals, thus.

Our production range

- Longitudinally welded stainless steel pipes
- Pipes from coil: \varnothing 60.3 – 610 mm; WT 3 – 12 mm
- Pipes from plate: \varnothing 219.1 – 2020 mm; WT 4 – 40 mm; lengths of 6 and 12 mtrs. (without circumferential welds)
- Grades: 1.4301/1.4307, 1.4541, 1.4401/1.4404, 1.4571, 1.4462
- Norms/testing: EN 10296-2; 10217-7 TC1/TC2; ASTM A312, A358, A790, A928

Your benefit

- BUTTING raw material stock for short-term requirements: plates in 1.4301/1.4307 and 1.4401/1.4404 in WT 4 – 12 mm
- Fast-Track: short delivery time for pipes made from plate, usually approx. 2-3 weeks (depending on quantity, execution and availability of raw material)
- Additional services: end bevelling, x-ray, hydrostatic test, mechanical tests, colour coding
- Flexible, lean and cost-effective production processes
- Approvals: ISO 9001/50001; OHSAS 18001; PED 2014/68/EU; AD2000-Merkblatt W0; Lloyds Register; DNV GL; BASF; Bayer; Shell; BP and others
